

## Have you heard the buzz about Environmental Management Systems?

1. The Air Force Center for Engineering and the Environment (AFCEE) provides integrated engineering and environmental management, execution, and technical services to ensure sustainable installations optimize Air Force capabilities. As environmental stewards, we will minimize the environmental impacts of our internal operations, as well as those of the products and services we provide in support of EO 13423, Strengthening Federal Environmental, Energy, and Transportation Management. To guide us in this effort, AFCEE will implement an Environmental Management System (EMS), in conformance with the ISO 14001 standard, ensuring that we:

- Manage Air Force built and natural infrastructure resources to ensure sustained access for the mission
- Proactively sustain compliance with relevant environmental legislation and regulations
- Implement pollution prevention practices where practicable
- Continually improve our environmental performance and EMS
- Perform our actions, develop our products and provide our services in ways that reduce our environmental footprint

2. This policy applies to all AFCEE personnel. We will communicate and integrate this program using procedures outlined in HOI 38-1, AFCEE Governance Structure.

DENNIS M. FIRMAN, SES  
Director
